

The nSider

The second quarter of 2022 has been a busy one here at nSide! Between the Mississippi partnership and summer conference season, our teams have been on the road nonstop. This quarter, we have seen a lot of progress with Mississippi mapping projects, and our team is growing every day.

What New Legislation Could Mean for School Safety

In an attempt to reduce the threat of violence in communities across the country, lawmakers recently passed the **Bipartisan Safer Communities Act** (S. 2938). In addition to community-wide measures, this act specifically addresses school safety in the following ways:

- It provides \$1 billion to help schools put in place comprehensive strategies to create safe and healthy learning environments for all students
- It provides funding for after-school, before-school, and summer programs, all of which have been shown to reduce the risk of violent incidents while increasing student achievement
- It provides avenues for states to implement, enhance, and expand school-based mental health programs
- It provides \$300 million through the STOP School Violence Act to students and educators for training and tools to prevent and respond to violence against themselves and others

*You can read the full text of this bill [here](#).

SUMMIT DATES

“

We will work diligently to invest more than \$2 billion provided under this law to improve mental health supports for students and expand access to school-based health services. We also will assist states and districts in using these resources to invest in evidence-based practices that support safe schools.

*-U.S. Secretary of Education Miguel Cardona
(speaking about the Bipartisan Safer Communities Act)*

”

MAPPING PROJECTS

One of the most distinguishing features about nSide has to be the interactive maps and the 360 degree photos of campus interiors. Our mapping teams come out to each campus to collect these images and plot critical infrastructure points that will aid in emergency planning and response. nSide puts a focus on place and how knowing and utilizing location can and will save lives. This quarter, we tackled some major mapping projects across Alabama and Mississippi with a collective 178 schools and 17.7 MILLION square feet mapped.
